

The Department of the Criptid Control
Mandate: prevent detection
Date: 1975, December, 17
Level Clearance: DCC -- [REDACTED]

DEPARTMENT OF CRYPTID CONTROL

INTERNAL USE ONLY

DOCUMENT TYPE: Operational Philosophy & Interagency Policy

CLEARANCE: LEVEL 3 OR ABOVE

TITLE: *Local Law Enforcement Utilization Guidelines*

REVISION: 1981 (ANNOTATED 1983)

PURPOSE

This document clarifies the Department's stance on:

- Local Law Enforcement (LLE)
- Civil Authorities
- Public Safety Agencies
- "Concerned Officials"

It also explains **why none of them are told the truth.**

GENERAL POSITION

The Department of Cryptid Control does **not** cooperate with local law enforcement.

We **use** them. This distinction is important.

DEPARTMENT OF THE ARMY
OFFICE OF THE ASSISTANT CHIEF OF STAFF FOR INTELLIGENCE
WASHINGTON, DC 20315

11 APR 1983

MEMORANDUM THRU DIRECTOR, DEFENSE INTELLIGENCE AGENCY
FOR DEPUTY UNDER SECRETARY OF DEFENSE (POLICY)
SUBJECT: Possible Acquisition Opportunity (U)--ACTION MEMORANDUM

1. (U) Purpose. To secure DUSD(M) guidance pursuant to the foreign material acquisition proposal outlined below.

2. (U) Discussion.

a. ~~(S-SECRET)~~ On 8 April 1983, a meeting was held in Atlanta, GA between Mr. Carl Dean Perry, Executive Vice President of Hughes Helicopter, and a representative from OACSI, DA. A DIA technician was also present. The meeting was arranged by OSD (Executive Secretariat) at Mr. Perry's request.

b. ~~(S-SECRET)~~ Mr. Perry has been to Iraq several times within the past year to coordinate the sale of Hughes (civilian) Model 300 and 500 helicopters to the Iraqi Ministry of Transport. During his visit in early April, Iraqi military officials hinted that it might be possible to exchange an MI-24 HIND D/E helicopter (condition unspecified) for permission to buy up to 100 Hughes Model 500 MD TOW helicopters. (Note: Mr. Perry made clear the benefits that would accrue to Hughes from such a sale. This notwithstanding, he believes that circumstances are propitious for USG to improve relations with Iraq and acquire a HIND helicopter at the same time.)

c. ~~(S-SECRET)~~ The proposal is complicated by a requirement to deal with Iraqi's agent in the United States. He is the owner of PAN Aviation, Miami, FL. According to Mr. Perry, the individual is involved in all Hughes activities and must be in this instance as well. Hughes has investigated the individual (name deleted intentionally) and found him to be a known international arms dealer who has had difficulties with US law enforcement agencies. To date he has conducted himself honorably with Hughes but Mr. Perry counsels caution when dealing with him. If USI

RATIONALE

Local law enforcement possesses the following qualities:

- Predictable behavior patterns
- Poor inter-agency communication

- High confidence, low curiosity
- A strong desire to be seen “doing something”

These traits make them **ideal containment tools**. They ask the wrong questions. They go to the wrong places. They arrive first. This is useful.

STANDARD UTILIZATION STRATEGIES

DCC field offices may deploy LLE assets in the following approved ways:

1. PERIMETER ATTRITION

LLE units are directed to:

- “Secure” areas with known cryptid presence
- Investigate misleading civilian reports
- Conduct searches in unsafe terrain

This:

- Keeps civilians away
- Provides real-time behavioral data
- Occasionally resolves the cryptid problem on its own

(Outcome statistics pending.)

2. CONTROLLED ESCALATION

If a cryptid must be destroyed or displaced:

- LLE is provided **partial information**
- Threats are framed as:
 - Feral animals
 - Cult activity
 - Gas leaks
 - “Unstable transients”

This ensures:

- Aggressive engagement
- Improvised tactics
- No survivors who understand what happened

3. SCAPEGOAT CONTAINMENT

In the event of:

- Civilian disappearance
- Unexplained fatalities
- Environmental damage

LLE narratives are encouraged to contain:

- “Ongoing investigation”
- “No evidence of foul play”
- “Isolated incident”

The public accepts these phrases.

They always do.

FIELD HUMOR ADVISORY

Dark humor is permitted in internal reports. This is not cruelty. This is **stress management**.

Approved phrasing examples:

- “Officer entered nest voluntarily.”
- “Deputy achieved rapid integration with ecosystem.”
- “Subject displayed outstanding bravery until disassembly.”

Do not use humor in documents that may be subpoenaed.

PUBLIC PRIORITIES (IN ORDER)

1. Cryptids remain unknown to the general population
2. Scientific extraction where feasible
3. Environmental stability
4. Civilian survival
5. Interagency goodwill

Reorder at your discretion only if authorized.

ON SCIENTIFIC EXTRACTION

Specimen recovery is preferred over termination.

However:

- Dead cryptids are easier to explain
- Living cryptids ask for resources
- Talking cryptids create paperwork

Per section IIV article 5 of initial report from first contact, no criptid should be prepared as food and/or consumed. This is to prevent another golden racklar incident. Should a criptid need to be consumed for containment or survival, as any good host, local authorities shall be served first.

Proceed accordingly.
