DEPARTMENT OF CRYPTID CONTROL

SCIENCE & APPLIED RESEARCH DIVISION

INTERNAL MEMORANDUM SERIES

THREAD ID: SCI-GEO-[REDACTED]-88

CLEARANCE: LEVEL 4 AND ABOVE

MEMO 6 — FINAL DIRECTIVE

FROM: SCIENCE DIVISION DIRECTOR

TO: FIELD OPERATIONS

DATE: [REDACTED] / [REDACTED] / 1988

SUBJECT: OPERATIONAL PRIORITY UPDATE

Effective immediately:

- GEO-[REDACTED] events are to be guided, not avoided
- Field agents are authorized to maintain proximity longer than standard safety windows
- Conflicting reports should be minimized during transit operations
- Success is defined by laboratory arrival, not personnel preservation

Scientific advancement requires contact.

Containment can be rebuilt.

ADDENDUM (UNSIGNED)

Progress requires sacrifice.

Historically, this has always been true.

The only variable is whether the sacrifice produces knowledge or merely fear.

We prefer the former.

PROJECT: SILENT NINER
CODENAME: [REDACTED]

FOR SECRET

END OF MEMO THREAD

NOTE:

This correspondence is not to be shared with Field Agents below Level 4.

Language may be summarized as "routine observation support."
